Jana Marra Is On A Mission To Show You Better Ways To Take Care Of Your Body, So Your Body Takes Better Care Of You

BY E. ADAM PORTER

You wake up the day after your vacation feeling amazing. Relaxed, refreshed, and ready to hit the ground running. And it's all thanks to your pre-flight IV vitamin infusion.

All your friends told you to try it, so you called Jana Marra, and did she ever deliver! She came right to your home, administered the IV supplements, and you felt them working almost immediately. Now, five days later, you still feel great. It's amazing how far the right level of nutrition and hydration can take you!

Proactive Living

The boat cruised across the bay, the white foam of the wake slicing through the shimmering water. The beacon atop the Egmont Key Lighthouse blinked, telling Jana Marra they were headed in the right direction. Her children—Gregory, Leonardo, and Lillian—leaned back, feeling the wind in their hair and the salty kiss of splashing water on their face.

“That was a great day,” Jana recalls. “We took the boat over to Egmont Key, toured the island, swam a bit. The water was perfect, calm, absolutely gorgeous. Being out on the water is my happy place. Those small islands are my sanctuary. Sharing those beautiful moments with my kids... It doesn't get any better.”

Jana knows *better*, because, over more than 20 years as a registered nurse, she's seen *worse*.

“After years watching what the healthcare system does to people, I felt God calling me to do something else, something better. If you take care of your body, it will take care of you. Bringing that awareness to people has become my mission. I want to teach people to think differently. Be proactive, not reactive, and you will feel better.

“What I do is all about delivering the most effective preventative medicine in the most efficient way. We all know that regular exercise and taking vitamins is good for your health. What a lot of people don't realize is the big difference in results between taking oral vitamin pills and IV vitamin injections. While vitamin supplements are better than nothing, you're really only absorbing about 20 percent of the good stuff. Most of the beneficial vitamins are getting eliminated, just because of how your body is processing them. But, when you get an IV, all of the vitamins—100 percent—are being directly absorbed into your bloodstream. That's a tremendous boost to your immune system and your overall health. And the best part, with an IV infusion, you feel it working almost immediately. I love seeing the expression on faces when people feel better than they thought they could.

“Knowing I can do that for people is an incredible blessing. I feel like I've found my calling. My goal, every day, is to help as many people as I'm able. Nights, weekends, holidays, doesn't matter when or where. If you need me, I'll be there.”

The Clear Choice

Michelle Leonard says there's “so much to love” about Jana and what she offers.

“I struggle with migraines—terrible, debilitating pain. I've had to be hospitalized several times because the pain is so intense. And, you know what they do when I get to the hospital? They put me in a dark room and hook my up to an IV drip to give me vitamins and pain medication. And, you know what Jana does? She hooks me up to an IV and gives me what I need.

“The big difference? Well, when I have to go to the hospital, it costs hundreds of dollars to get treated, maybe more. Jana comes right to my home for a fraction of the cost. Either way, I feel better. Except, with Jana, I get to feel better in the comfort of my own home, faster, and for much less money. When you think about it, Jana is the clear choice.”

Feel Better

Dr. Michele Louiselle says Jana makes it easy to feel better.

“I’ve known Jana for many years now. She has worked in our clinic, doing IVs and blood draws for us. Not only is she a ‘good stick,’ but she’s a knowledgeable, skilled professional who is also a very caring person.

“If someone wants more energy, would like to boost their immune health, Jana is an outstanding resource. She makes it easy to feel better and be healthier, because you don’t have to go to a clinic; she comes to you.”

Healthier Than Ever

When Ashley Burns was diagnosed with cancer, she wanted something to help with side effects of the treatment.

“While undergoing chemotherapy treatments, I looked for natural therapies that could help with the side effects and found several that really worked. One of those was high-dose IV vitamin C. But I didn’t know of anyone who could administer that dosage in that way... until I met Jana. Her IV treatments helped me feel so much better.

“These days, I’m feeling healthier than ever. I am so grateful I met Jana!”
